MINNESOTA

—❧ 1927 ❧—

It is with great pleasure that we once more send you our annual list of Gladiolus, Peonies and Dahlias and take this means of expressing to you our appreciation of your patronage, both in the past and for the future.

Our ambition is to grow the finest of these flowers that can be acquired and to send out the finest stock that can be grown.

We spare neither time or labor in raising our crop. Should you favor us with your orders you may feel confident that you are buying the best stock obtainable.

We extend to you a cordial invitation to visit our gardens any time during the blooming season, which is from June 1st, until heavy frosts.

Sincerely yours,

J. V. EDLUND,

GENERAL INFORMATION

Order early, as the stocks of some of our finest varieties are limited. Early orders are solicited to prevent disappointments in case the varieties selected should be sold out.

Discounts. On all orders received before March 1st, 1927, amounting to \$2.00 or more, we will allow extra bulbs, your selection equal to 10% of the order. No orders accepted after May 1st.

We do not substitute unless directed to do so.

Terms—Net cash before shipment, 25% deposit will hold your order until March 1st. Orders not fully paid will be sent C. O. D. for the balance.

Remittance may be made by post-office order, bank-draft, express money order or personal check.

We pay postage on all orders of \$1.00 or more; of less amounts add 25 cents to cover postage.

Six bulbs sold at the dozen rate.

At prices quoted $\frac{1}{2}$ size *Gladiolus* bulbs will be sold at $\frac{1}{2}$ price, where the price is 20c or more.

Wholesale orders. We are in a position to accept wholesale orders on quantity lots of many varieties listed. If interested write for quotations.

OUR GUARANTEE

Every bulb offered is absolutely true to name and up to size. We consider a bulb $1\frac{1}{4}$ inches in diameter a good blooming size.

If for any reason you are dissatisfied with the stock, when received, return it and your money will be refunded.

ANNOUNCEMENT

In 1927 this bank will hold its Seventh Annual Peony Show in the Bank lobby. The Second Annual "Glad" Show will also be held by the bank at a time when these blossoms are at their best.

While the Bank undoubtedly receives considerable desirable publicity as a result of these exhibitions, this is by no means the only reason such shows are undertaken.

We believe we are helping to make St. Paul a more beautiful city and by holding flower shows and offering prizes for the best exhibits we are encouraging home owners in their work of improving their yards.

In 1921, the year of our first Peony Show, very few took part in the competition for prizes. We have noted with a great deal of pride how the exhibits have grown from a very few to hundreds. At our last show the lobby of the bank was taxed to capacity with exhibits which would indicate that each year more and more people are becoming interested in the growing of flowers.

With very few exceptions, it will be found that the home that has a carefully planned flower garden and well kept grounds, is a substantial and thrifty home from which radiates happiness and contentment. That is the kind of a home that is an asset to any city and the business interests that serve it.

How to Grow Gladioli

Bulbs and root stock, such as we offer in this catalogue, while they will produce an abundance of glorious blooms throughout the season, on most any reasonably fertile soil they respond, seemingly with an abundance of joy, the color of deep richness and beauty will surpass your fondest expectation when the soil is well filled with the proper plant foods.

From our experience, we would highly recommend applications of commercial fertilizer as follows:

After trenches are made four to six inches deep, scatter one pound of fertilizer to each hundred feet along the sides of the trenches, rake this material well into the soil throughout the row.

Plant in the same manner as without fertilizer.

After planting, broadcast five pounds to per hundred square feet over the surface and rake into the soil well.

We recommend Armour's 2-16-8 fertilizer for soils that are fairly well supplied with manures and organic matter; for soils that are lacking in manures or organic matter would recommend 6-8-6 Armour Lawn and Garden Grower.

For those that may be unable to secure same from their local dealer, we will be glad on application, to furnish same at reasonable cost.

Plantings may be made any time from early garden making time until the middle of June, which is about as late as is safe to make the last planting in order to secure flowers before frost.

Cultivate often and thoroughly; the more you cultivate the better they grow. Do not allow the ground to bake around the plants. The bulbs should be dug before the plants are too ripe and before hard frosts. Dig the bulbs and cut off the tops close to the bulb. Dry well in the open air and sunshine, then put in dry airy place for two or three weeks to cure. Be sure to protect against frost. As soon as well dried the old bulb, bulblets and roots can easily be removed.

Put bulbs in trays not over four inches deep. Store in cellar or basement where the temperature is uniform and around 40 to 45 degrees.

FOR CUT FLOWERS

Cut spike when first bud opens, leaving at least four or five leaves on stalk to mature the bulb. Place in water and change the water each day, at the same time cutting a little off the end of stem. Placing flowers in cellar at night will add to the life of the bloom.

MINNESOTA GROWN

Minnesota grown bulbs are conceded to be the best produced anywhere, because of the climatic conditions which tend to develop a much firmer, healthier bulb than those grown under warmer and more humid climatic conditions.

At the Minnesota State Fair each year visitors are always attracted by our display of Gladiolus, where we receive high awards.

In 1926 we received twenty-six awards out of thirty-one entries.

TO OUR TWIN CITIES CUSTOMERS

If it is more convenient, you may leave your orders with Donaldson's Flower Department, Minneapolis, or The Golden Rule Flower Shop, St. Paul, where they may be charged to your regular accounts, if you so desire.

Dahlias

Although our specialty is growing Gladioli and Peonies, we have devoted a limited space to Dahlias. We have selected varieties that grow and bloom well even in very dry times such as we often have during the month of August, in this vicinity.

Planting should be done from May 10th to June 1st. The tuber should be laid flat down, with eye upwards, about five inches below the surface; cover with rich earth about two inches, then about an inch of compost mixed with wood ashes if possible, and the balance of the hill filled with soil in which has been mixed a small amount of lime and nitrate of soda. Tubers should be set at least three feet each way.

Cultivation—Cultivate until the plant is in bloom; when in bloom and the rest of the growing season cover the surface with straw, hay, lawn clippings, or most anything about four inches deep. No cultivation.

Never allow the blooms to die on the plant, or to go to seed. This is the one thing that will keep your plants in bloom for a long time. After digging, they should be stored in a frost-proof cellar, tops down, with a little dirt sprinkled over them.

Prices quoted are for field grown divided roots. No orders shipped before May 1st. Postage will be paid on all orders of \$1.00 or more; of less amounts a charge of 15c will be made to cover postage.

Our collection of Dahlias received the highest award at the Minnesota State Fair 1926.

AMUN-RA (Seal)—A decorative of great size in the richest shades of coppery bronze. The stems are long and stiff, and the flowers keep splendidly Each \$1.50

BALLET GIRL (Bessie Boston)—Cactus. This is one of the most striking dahlias in our gardens. Some of the flowers are orange edged white, others pure orange and still others a variation of white and orange all on the same plant. A splendid cut flower and there is no better for exhibition..... Each \$1.50

COUNTESS OF LONSDALE (.....)—Cactus. The freest flowering Cactus dahlia in the collection, and perfect in form. Color, an exquisite shade of rich salmon, with just a suspicion of apricot at the base of the petals..... Each 35c

CALIFORNIA ENCHANTRESS (Bessie Boston)—Hybrid Cactus. Beautiful shade of light pink. The large, well-formed blooms are held erect on long stout stems..... Each \$1.00

- VENUS** (Marean)—Decorative. Soft shade of creamy white with lavender suffusion, low-growing bush, flowers carried well above foliage on long straight stems. A profuse bloomer, excellent as a cut flower as well as exhibition.....Each 75c

Peonies

Peonies are perfectly hardy, requiring no protection whatever, even in the most severe climate, and once planted, increase in beauty each year.

Planting—Peonies may be planted any time in the Fall, from September 1st until the ground freezes. No Peonies are handled by us in the spring, as that is entirely the wrong time to plant them.

Size of Root—Making a specialty of growing Peonies and Gladioli, our progress depends entirely upon the results obtained from our roots and bulbs; for this reason we quote prices on 3 to 5 eye, or large divisions only.

Important! An important point to observe in the planting of Peonies is not to plant too deep. The roots should be placed so that the eyes are two inches below the surface, and the soil tightly packed about them.

Shipments—Orders from one to three roots can go cheapest by parcel post. We will ship this way if customer will remit with order, ten cents extra for each root ordered. Larger orders should go by express, collect. Excess postage will be returned.

VISITORS ARE ALWAYS WELCOME

The figures that follow the variety name denote the rating given by the American Peony Society. The valuation is based on a possible score of ten. Where no rating is shown, the variety is too new to have had sufficient votes to be properly judged.
